WORK EXPERIENCE

Software Engineer Intern
Seller Tower

11/2024 - Present   *Kandy, Sri Lanka*
Seller Tower is a company that produces SaaS products to support all types of retail businesses with comprehensive solutions.

Achievements/Tasks
- As a Full Stack Developer, I developed user interfaces using Next.js, along with Ant Design and Bootstrap for styling. On the backend, I worked with Go to build and manage services, while utilizing Amazon DynamoDB as the database.
- Additionally, I participated in weekly scrum meetings, code review sessions, and collaborated on prototype designs using Figma.
- Stacks- Next JS, Tailwind CSS, Go, Antd, Amazon DynamoDB, GIT and Docker
